

OE-LRLIR

Long Range, multifunction laser system

Product Description:

The OE-LRLIR is a multifunction laser system that emits visible and infrared laser points as well as a focusable Infrared illuminator. The OE-LRLIR IR laser and IR illuminator can be used covertly with night vision equipment. The visible laser (available in green or red) is excellent for sighting and designating targets when actively engaging. Visible and

infrared aiming point lasers share the same tool-free windage and elevation adjustments while offering precise pin-point weapon aiming and target acquisition. The Infrared illuminator with a focusable function can offer target area illumination under any light condition. The IR illuminator also works with tool-free windage and elevation adjustment to precisely co-align with the laser dot.

Specifications:

Output Power (High/Low)	
Red Laser Sight:	<15 mW / < 5mW
Green Laser Sight :	<15mW / <5mW
IR Laser Sight :	<50mW / <1mW
Wavelength:	
Red/Green Laser Sight:	635nm/532nm
IR Laser Sight/Illuminator:	830nm
Range (Night/Day)	
Red Laser Sight:	High (2000m/30m) Low (500m/10m)
Green Laser Sight:	High (2000m/100m) Low (1000m/30m)
IR Laser Sight:	High (3000m) ; Low(500m)
IR Illuminator:	High (5000m); Low (1000m)
Electrical:	
Power Supply	One AA Battery(1.5 Volt) Included, 4 hours
Battery Indicator:	Blinking Red LED = Low Battery
Mechanical :	
Body:	Built by Aircraft grade 6061(T-6) Aluminum with hard anodized finished.
